

Dear Judge Hansen,

March 16, 1976

I'm writing to you about my brother, Ted Bundy, whom you convicted earlier this month.

Ted has always been concerned for his brothers and sisters. Being the eldest he has often advised us on personal matters. He's concerned about are education, who we associate, ect. Since graduating from High School in 1965, and moving off too college he continues close communication with his family. I've always known him as a rational, nonviolent person - that doesn't come anywhere near the description of police and prosecutors.

Ted has been intensely interested in government for many years. He entered law school to learn more about our governments laws. He's got a first hand close-up experience this past several months. Ted has grown wiser because of it - inspite of it.

Ted encourage me to do something with my life usefull. Because of him I deceded to enter the navy, a decision I don't regret.

Please let Ted return to a normal way of life

although it will never be the same.

Please show leanancey in Teds case. In my heart I know Ted is innocent.

Thank you for your time, and I would hope you take very carefull consideration of what you are going too do to a young mans life.

Respectively Yours

Glenn D. Bundy
