Video Capture

Case # 22-M09903
Date: 12/22/2022

On December 22, 2022, I was tasked with re-installing the exterior camera, known as the "Lightbulb Camera" at [REDACTED] King Road, to capture some comparison video and audio. I contacted one of the tenants, T [REDACTED] I [REDACTED], who gave me permission to access her residence and conduct the recording.

Upon arrival, I unplugged the power to the current router and removed the camera from the light socket on the exterior of the residence. I then powered on the router I had secured from the residence earlier and installed the camera I secured as evidence earlier into the light socket. While installing the camera, I hear a crack and felt the lightbulb base mount become loose. It should be noted the approximate temperature outside while installing the camera was between 5 and 9 degrees.

I previously had installed a new SD Card into the camera and powered on the router and camera at the Moscow Police Department to ensure the camera was functional.

I then was able to monitor the camera using the Homeye Pro app on my phone. Cpl Brett Payne was able to drive a white colored vehicle into the view of the camera. Sgt Dustin Blaker parked a vehicle near the residence and closed the doors and trunk on a vehicle for audio comparison. A K9 Unit from Lewis County Sheriff's Office was utilized to capture barking audio comparison from the residence.

Upon completion of the data collection, I powered off the evidentiary router and removed the camera from the light socket. In doing so, the base detached from the camera and a wire became disconnected. I gathered the router and camera, placed them back into their evidentiary bags and returned them to the secure computer forensic lab.

I reinstalled the current camera and reconnected the power to the new router. I contacted I [REDACTED] to ensure she could access her camera, and she responded in the

affirmative. Cpl Payne and I then ensured the residence was locked and left the residence without further incident.

Upon returning to the Moscow Police Department, I was able to download the videos collected and they were saved to the server located in the secure computer forensic lab.
